IN THE DRAWINGS

The drawings are amended, as shown in red. In particular, reference numerals have been changed in Figures 2, 7 and 9. Approval of the changes to the drawings is respectfully requested.

IN THE CLAIMS

Please amend claims 1 through 21 as follows:

1. (Amended) A rack mounting system for [retractably] supporting a side of a computer system component in a component rack, the system comprising:

a recess in the computer system component side;

[identical left and right] support rails[,each support rail being] securable in the rack [in mutually facing parallel relation, each support rail including a first securement region adjacent to a first longitudinal edge and a second securement region adjacent to a second longitudinal edge, the first and second securement regions being symmetrical about a longitudinal axis of the respective support rail]; and

[identical left and right slide assemblies, the left] one slide assembly being secured to [the first securement region of the left] one support rail and in said computer system component side recess and the [right] other slide assembly being secured to the [second securement region of the right] other support rail.
